failure to comply letters to providers. This is so we can consolidate and make sure we are sending the same letters to providers.  • Consumer Center for Health Education & Advocacy - They are preparing for the Drug Medi-Cal contract and adding more staff and creating a new unit There was a State audit and one of the items they looked at was network adequacy/timely access. They asked why we had no appeals and why so few grievances. As a law firm, they are not allowed to troll for clients and coach people to file a grievance.  • Health Plan Workgroup - Rady's came to the meeting and talked about the new CCS pilot. We discussed how we can work together and data sharing. They will probably start coming to the Health Plan Workgroup. They will send us a one-pager for clinical staff There was a discussion regarding Accountable Communities for Health and if Jeff Dziedzic should still continue attending the meetings The Targeted Case Management group came to our meeting and discussed if we possibly need a new MOA in place  • San Diego Regional Center Workgroup - We submitted our seven MOUs to DHCS • Community Based Adult Services Ad Hoc Workgroup - They have their first UnitedHealthcare participant receiving CBAS services. Molly is working with Jeff regarding Aetna's CBAS contact(s).
